

MULTI-AI: INTERACTIVE USER INTERFACE GALLERY

A Walkthrough of Workspace Pages, Panels, Themes & Viewports

INTRODUCTION

This document compiles the user interface layouts of the Multi-AI consensus and debate workbench. It displays high-resolution screenshots capturing each primary view (Workspace, Expertise, History, Insights, Debate, Settings) and responsive viewports (Desktop & Mobile) alongside descriptions of visible controls, action buttons, and live telemetry widgets.

1. SECURE AUTHENTICATION PORTAL

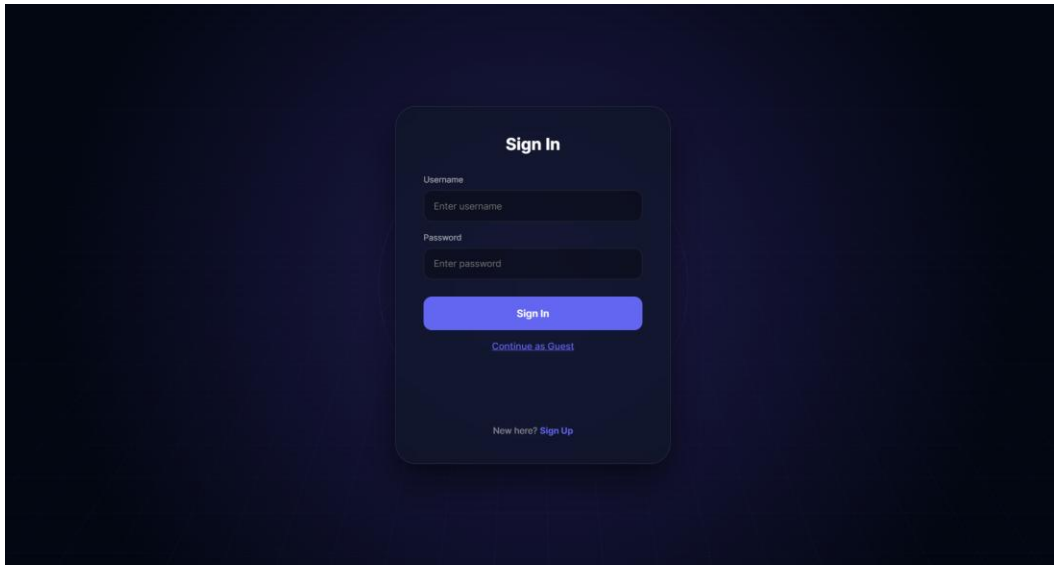

Figure: Secure Sign-In Interface

Figure 1.1: Secure Sign-In Portal (Dark Theme)

****Description of Visible Elements:****

- ****Login Form Card****: Anchors center coordinates hosting standard Username/Password form fields.
- ****Bypass Link****: Features a dedicated Guest button selector allowing reviewers to instantly load the workspace console without active database authentication.
- ****Branding Header****: Displays the prominent MULTIAI title lockup.

2. DOCK-AREA WORKSPACE LANDING VIEW

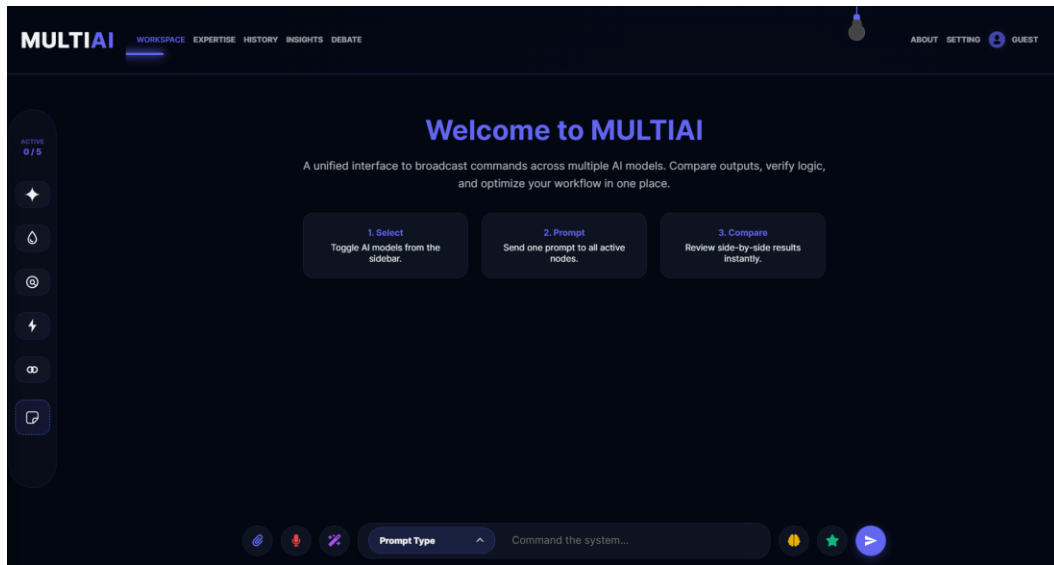

Figure: Workspace Console Landing Page

Figure 1.2: Workspace Dashboard Landing Page (Dark Theme)

Description of Visible Elements:

- **Welcome Overlay Banner**: Renders central typography explaining system operations (Select, Prompt, Compare).
- **Views Swiper Bar**: Houses horizontal buttons to switch pages (Workspace, Expertise, History, Insights, Debate, About, Settings).
- **Active Model Indicator Badge**: Located in the sidebar, displaying active count ratios (e.g. 0/5 Active).
- **Lightbulb Toggle wire**: Sticky theme switch suspended top-right.

3. SIDE-BY-SIDE RESPONSE CHAT OUTPUTS

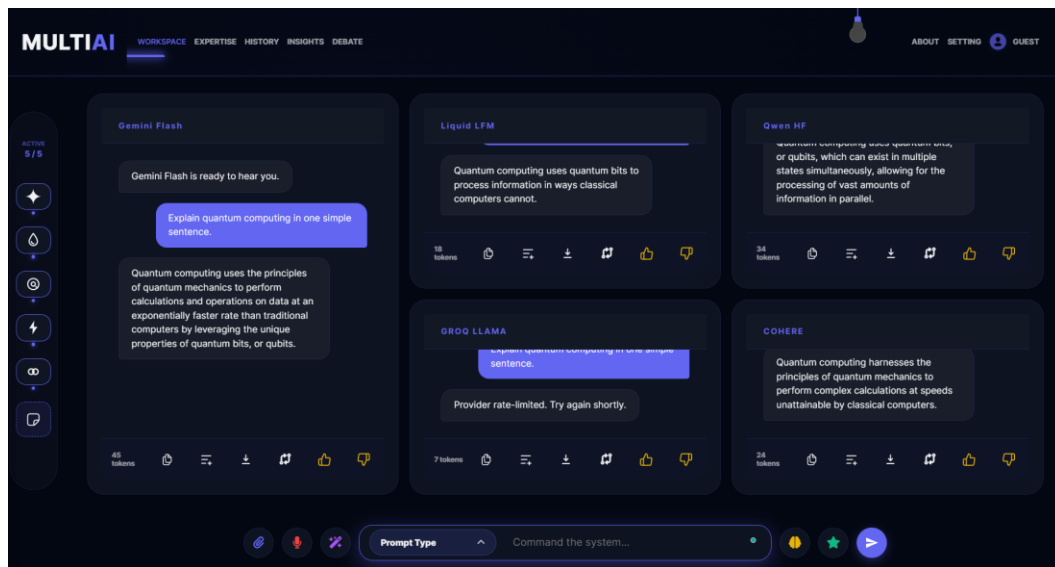

Figure: Comparative Chat Response Cards

Figure 1.3: Comparative Prompt Broadcast Outputs (Dark Theme)

Description of Visible Elements:

- **Typewriter Response Cards**: Displays side-by-side comparative answers styled in glassmorphic borders.
- **Latency Telemetry Badges**: Details request duration stats (ms) and word counts at the bottom of each card.
- **Feedback triggers**: Incorporates thumbs up/down icons to log user voting preferences in MongoDB.

4. EXPERTISE PERSONA CUSTOMIZER

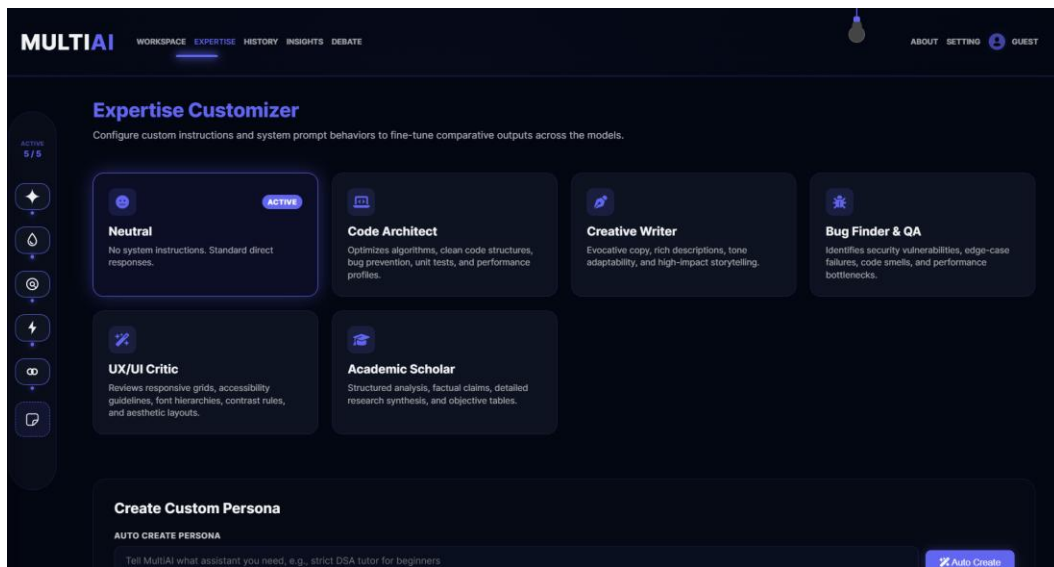

Figure: Model System Prompt Presets

Figure 1.4: Model System Instructions Configurator (Dark Theme)

Description of Visible Elements:

- ****Steerable Presets Grid****: Custom instruction cards guidance mapping different system prompts (e.g., Code review, Creative Writer).
- ****System Instruction textareas****: Custom input boxes to modify behaviors.

5. SESSION HISTORY DIRECTORY

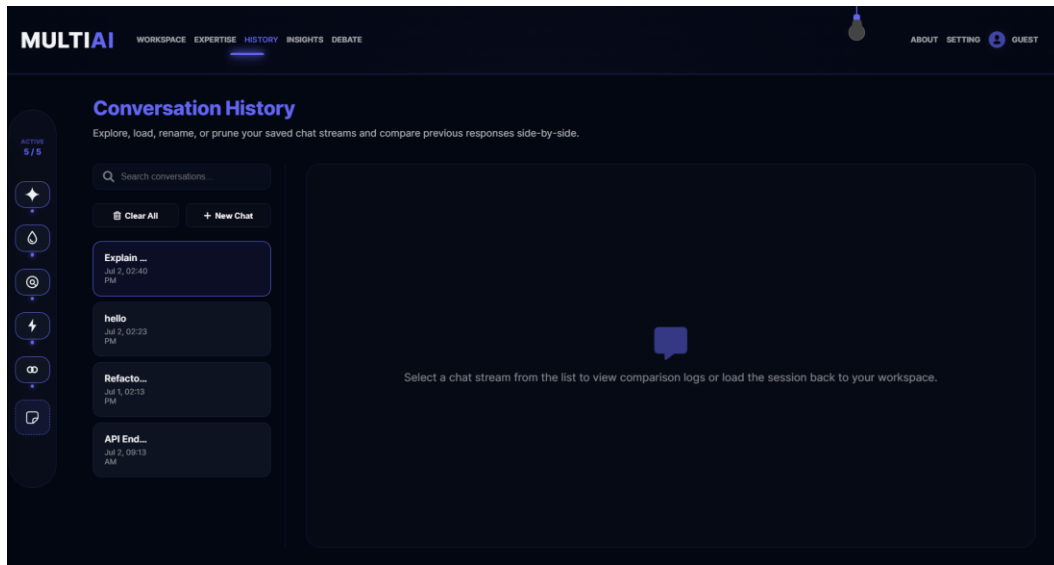

Figure: Conversations Log Directory

Figure 1.5: Conversations Log Directory (Dark Theme)

Description of Visible Elements:

- **Conversations List**: Displays past queries sorted by timestamps.
- **Differential Sync indicator**: Confirms session data is synced securely using Mongoose bulk write operations.

6. INSIGHTS TELE-ANALYTICS DASHBOARD

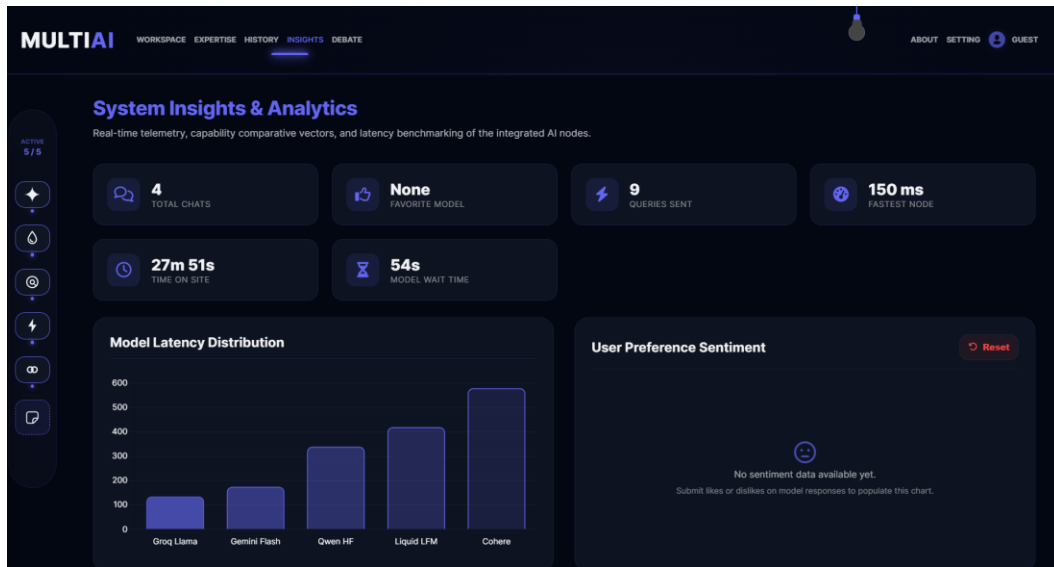

Figure: Telemetry Analytics Graphs

Figure 1.6: Insights Analytics Dashboard (Dark Theme)

Description of Visible Elements:

- **Feedback Sentiment Dial**: Aggregates likes/dislikes statistics in a donut chart.
- **Avg Response Speed Chart**: Plots model latency benchmarks over time.

7. AUTOMATED MULTI-TURN DEBATE ARENA

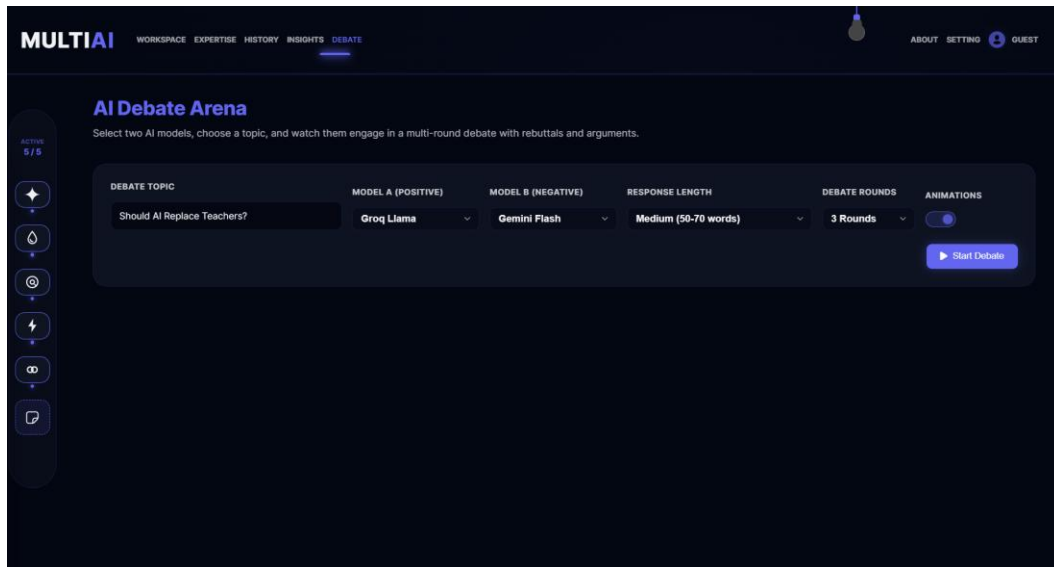

Figure: Model Debate Simulator Panel

Figure 1.7: Multi-Turn AI Debate Arena (Dark Theme)

Description of Visible Elements:

- **Model A & B selectors**: Configures debating participants.
- **Debate Transcript Box**: Renders alternating turn-based model statements.
- **Consensus judge**: Automatically reviews the debate and displays a consolidated summary.

8. SYSTEM CONFIGURATION & BYOK CREDENTIALS

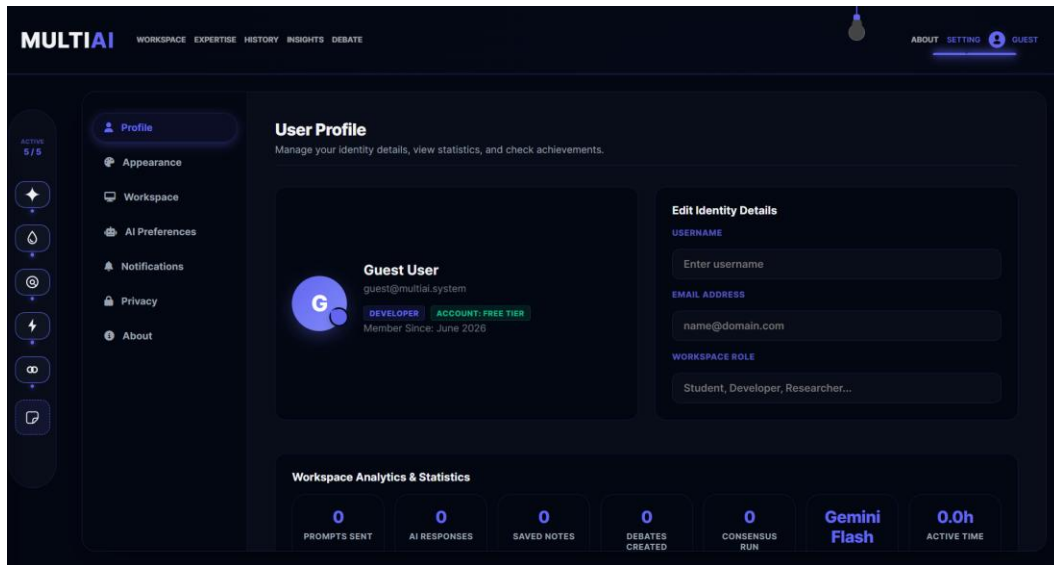

Figure: General Settings Configuration

Figure 1.8: General Settings Configuration (Dark Theme)

Description of Visible Elements:

- ****BYOK Credentials Input****: Allows secure entry of custom API keys (Gemini, OpenRouter, Groq).
- ****Account details****: Manages academic profile details.

9. RESPONSIVE MOBILE VIEWPORT VIEWS
